Md. gas drilling panel discussing best practices

Businessweek

CUMBERLAND, Md. (AP) — A state panel studying prospects for hydraulic fracturing for natural gas in western Maryland is trying to pinpoint the best practices used elsewhere. That's the main focus of a meeting Friday in Cumberland of the Marcellus ...

Not much new in Wyoming fracturing study

FuelFix (blog)

New samples from beneath a Wyoming gas field where the U.S. Environmental Protection Agency linked hydraulic fracturing to groundwater pollution seem unlikely to sway hearts and minds on a nationwide debate over the contentious issue: The additional

Hydraulic fracking will add a radioactive cocktail to your glass of water

Golden Gate Xpress

Hydraulic fracturing, also known as fracking, is the process where gallons of water and chemicals are pumped 8,000 feet underground to create something like a mini earthquake. The pressure from the water and chemicals breaks apart rocks and releases ...

Matt Damon's 'Promised Land' Condemns Fracking, Funded by Arab Royalty

Opposing Views

Since recent events have demonstrated the relative environmental soundness of hydraulic fracturing – a technique for extracting oil and gas from shale formations – Promised Land's script has been altered to make doom-saying environmentalists the tools ...

'Fracking' uses less water than competition

The Newark Advocate

There has been much concern expressed about the amount of water used in hydraulic fracturing for the recovery of oil, natural gas and natural gas liquids. However, the amount of water withdrawn for electric power generation and irrigation is ...

Bipartisan Letter Expresses Concern with EPA Overreach

Canada Free Press

We've already seen in three separate cases, EPA's self proclaimed philosophy of 'crucifying' American energy producers; now, EPA is attacking hydraulic fracturing by another route in its efforts to expand the definition of 'diesel fuels.' States have ...
